No.CoE/ 1288 /2022,

Dated: 07/02/2022

NOTIFICATION

After introduction of CBCS system, some passed out/continuing students of P.G. Departments, 3-Year LL.B Course, 5-Year Integrated LL.B Course and students of Institutes like IMCA, IED, ICMR, RIE under this University very often enquire about the formula for conversion of CGPA to approximate percentage of secured marks as required while applying for higher studies / jobs etc. It is hereby clarified that the issued mark sheets contain both **Grade** and **Marks** against each paper as well as SGPA and aggregate mark in each semester. Percentage of marks can be calculated from the given marksheet as mark awarded divided by total mark multiplied by 100. As such, formula for conversion of CGPA to approximate percentage of mark is not necessary.
